

A Blueprint for Our Future

Strategic Plan 2017–2021

Powered by Discovery and Innovation

The UC Irvine Health Strategic Plan charts our path to achieving distinction as a top academic institution and an essential health system equipped to thrive in a marketplace undergoing significant transformation.

This path is guided by our vision statement: Powered by discovery and innovation, UC Irvine Health will advance individual and population health.

Our purpose

UC Irvine Health is comprised of a team of scientists, educators and healthcare professionals united by our mission: Discover. Teach. Heal.

Our work is guided by six core values:

- Accountability
- Respect
- Integrity
- Innovation
- Service
- Excellence

Our aspirations

We will leverage existing areas of strength to become a progressive industry leader able to excel in a shifting healthcare landscape.

To realize our vision, we set five aspirations:

- Patient Care Excellence
- Innovative Education
- Research Distinction
- Complex Care Leader
- Population Health Manager

How do we get there?

The plan establishes realistic strategies to achieve our research, education and clinical goals. They are:

Research

- Rejuvenate research faculty
- Improve research resources
- Enhance and expand clinical trials

Clinical

- Achieve clinical integration
- Invest in clinical programs
- Ensure adequate access to care
- Develop an integrated ambulatory care network
- Achieve clinical and cost transformation
- Advance quality care, patient safety and satisfaction
- Integrate our IT systems
- Advance population health delivery models

Education

- Develop innovative curricula
- Advance diversity among students, faculty and staff
- Align faculty incentives to create a consistent learner experience
