

A Blueprint for Our Future

Strategic Plan 2017-2021

Powered by Discovery and Innovation

The UC Irvine Health Strategic Plan charts our path to achieving distinction as a top academic institution and an essential health system equipped to thrive in a marketplace undergoing significant transformation.

This path is guided by our new vision statement: Powered by discovery and innovation, UC Irvine Health will advance individual and population health.

UC Irvine Health, like all academic medical centers, faces increasing financial pressures and growing demands to deliver exceptional, accessible, high-value care. To meet these challenges and ensure our long-term viability, we must leverage our existing strengths in research, education and clinical care to advance the health of individuals and populations.

Our success will depend upon conducting distinctive research, offering innovative education and providing world-class care and exemplary patient experiences.

Our plan identifies five aspirations to guide our efforts:

- Patient Care Excellence
- Innovative Education
- Research Distinction
- Complex Care Leadership
- Population Health Management

The plan establishes targets and milestones to measure our progress for each strategy. Everyone at UC Irvine Health has a role in the successful execution of the strategic plan together as a team.
